

DG MICROPRONIX PVT.LTD.

About

DG Micropronix is an organization that takes pride in India's booming IT infrastructure, contributing to the nation's economic growth since 2006. We are a front-runner in providing technical solutions to complex industrial challenges and back ourselves solely on the basis of providing expertise and high-quality services. Our success in the past few years is credited to a dynamic research team and a hard-working management team, constantly exploring new technologies to deliver and upgrade the optimal solution for our clients.

Vision and Mission

We at DG Micropronix envision providing cutting-edge technology to strengthen the IT community through efficient solutions and transform our nation on a technological front. This automatically defines our mission to help grow the organization to a size where we can cater to an increasingly larger client-base every year. We believe that the investments of a highly-skilled human capital and countless global experiences can definitely convert our vision into reality.

Core values

In a world, where profit surpasses all motivations in business, we at DG Micropronix believe in a client-adaptive approach to provide solutions and build a strong professional relationship. We deliver innovative solutions for their specific needs. We strive to stride the extra mile to serve you better every single time.

Integrity is another core value that rules our work ethics at DG Micropronix. Our transparent work culture with strict adherence to business ethics helps us to stand ahead in our endeavors. The high-quality output is usually a combination of absolute timeliness blended with effective strategies while optimizing budget constraints.

Our Services

We offer a wide range of solutions, often paired with cover supply and maintenance for diverse IT projects, all under one roof. Our services extend to the following categories:

1. Network management solutions

Our team is equipped to design and build entire network management systems catering to your specific needs. This includes the setup of:

- a. Servers, Data Storages and SAN Storage Equipments
- b. Data Center (DC) and Disaster Recovery (DR) Equipment
- c. Active Networking Equipments (Wired & Wireless)
- d. Passive Networking Components

3. Hardware solutions and workspace essentials

You will find all Computer hardware related services under this category. We cover the essentials of every business, including:

- a. Workstation setup and management
 - Includes printers, plotters, scanners, and other relevant peripherals
- b. Laptops and Accessories

We also help install the basic essentials for every type of office, including:

- a. Software management systems (Microsoft, Redhat, CentOS, Oracle, Solaris)
- b. IP EPBAX System
- c. Video Conferencing System
- d. PA System

5. Cloud solutions

Having a cloud setup is vital for fast-paced organizations today, where remote working is prevalent. At DG Micropronix, we develop custom software for your specific cloud-based needs. We have executed numerous cloud-based projects to date with utmost client satisfaction.

2. Security solutions

We also help you in setting up secured systems for your IT infrastructure. The safety of your confidential data is our priority. Our solutions often include installations of:

- a. Cyber Security System
- b. Intelligent Surveillance System
- c. Biometric System
- d. Access Control System
- e. Battery Backup System
- f. Fire Alarm System
- g. Drone Technology

4. Workspace automation solutions

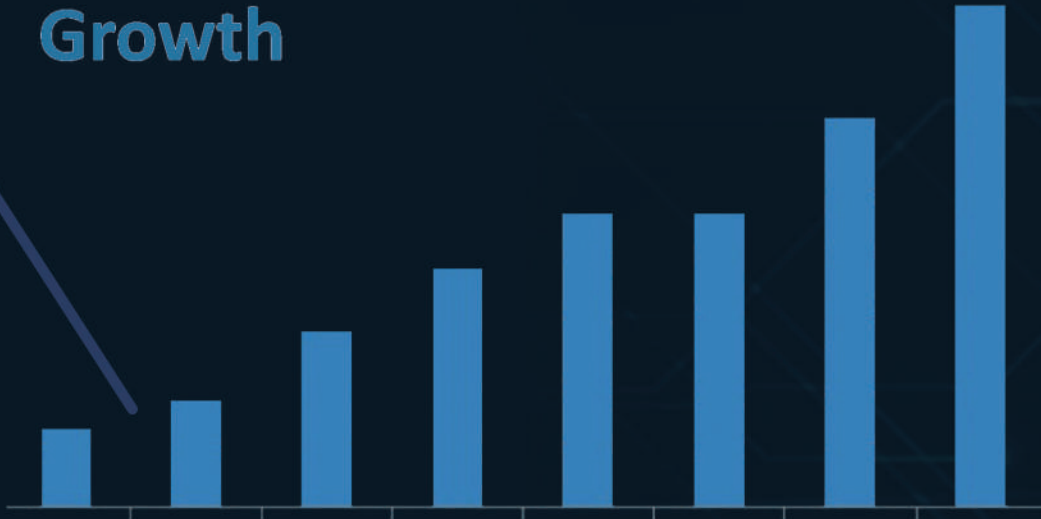

In addition to setting up basic workspaces, we have the capability to provide various robotic/automation solutions, compatible with SCADA, PLC, and IoT. Our competency in automation is well-praised in the industry.

6. Quantum solutions

Our research team is currently exploring the quantum regime to obtain cyber-security solutions unparalleled to any of its existing classical counterparts. Although this is strictly under research, we believe our breakthrough can cause a paradigm shift in industry-grade security solutions.
